**QUALITY SEEDS FOR RICH HARVEST**

**[WWW.NAVEDASEEDS.COM](http://WWW.NAVEDASEEDS.COM)**

## Bittergourd Saha F1, NA-311

- Vigorous plant growth, high yield
- Fruit: 20-22 cm long, spiny, dark green color
- Harvesting: 50-55 days of sowing
- Suitable for long duration harvest

## Bittergourd Samar F1, NA-332

- Vigorous plant growth, high yield
- Fruit: 14-15 cm long, spiny, Dark green color
- Harvesting: 40-45 days of sowing
- Suitable for long duration harvest

## Bittergourd Soma Plus F1, NA-309

- Vigorous plant growth, high yield
- Fruit: 20-21 cm long, spineless, green color
- Harvesting: 50-55 days of sowing
- Suitable for long duration harvest

## Bittergourd Vivan F1, NA-305

- Vigorous plant growth, high yield
- Fruit: 8-10 cm long, spiny, dark green color
- Harvesting: 45-50 days of sowing
- Suitable for long duration harvest

## Bottlegourd Keshav F1, NA-125

- Vigorous plant growth, high yield
- Fruit: 40-45 cm long, Uniform green color
- Harvesting: 40-45 days of sowing
- Long cylindrical, no specks on fruits.

## Bottlegourd Bhumi F1, NA-111

- Vigorous plant growth, high yield
- Fruit: 20-22 cm long, spiny, dark green color
- Harvesting: 50-55 days of sowing
- Round, no specks on fruits.

## Bottlegourd Balwan F1, NA-108

- Vigorous plant growth, high yield
- Fruit: 10-15 cm long, Uniform green color
- Harvesting: 45-50 days of sowing
- Round with neck, no specks on fruits

## Bottlegourd Hansa F1, NA-120

- Vigorous plant growth, high yield
- Fruit: 25-30 cm long, Uniform green color
- Harvesting: 45-50 days of sowing
- Cylindrical, no specks on fruits

## Cabbage Reba F1, NA-765

- Excellent field holding capacity
- Early maturity, firm round head with bluish green color
- Harvesting: 75-80 days of sowing
- Suitable for long duration harvest

## Cabbage Doly F1, NA-755

- Excellent head firmness, early maturity
- Average fruit 1 to 1.5 KG
- Harvesting: 75-80 days of sowing
- Suitable for long duration harvest

## Cabbage Samriti F1, NA-775

- Vigorous Uniform plant, high yield
- Good Field holding capacity, head is very flat
- Green to light green foliage, having good wrapper leaves
- Suitable for fresh market

## Capsicum Leona F1, NA-80

- Vigorous plant growth, dense foliage
- Shiny green fruit, firm, blocky
- Maturity: 60-65 days after transplanting
- Suitable for long shipping

## Capsicum Trinket F1, NA-27

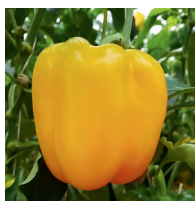

- Red blocky, shiny fruits
- Fruit: 180-200 Gm
- Maturity: 65-70 days after transplanting
- Suitable for protected cultivation

## Capsicum Lara F1, NA-81

- Vigorous plant growth, dense foliage
- Shiny green fruit, firm, blocky
- Maturity: 60-65 days after transplanting
- Suitable for open field cultivation

## Capsicum Eliana F1, NA-26

- Yellow blocky, shiny fruits
- Tall and vigorous plant
- Good keeping quality
- Suitable for protected cultivation

## Chilli Jiya F1, NA-4060

- Vigorous plant with high yield
- Fruit: 10-11 cm attractive green color
- Maturity: 70-75 days after transplanting
- Green fresh and red dry, thick

## Chilli Urmil F1, NA-4090

- Vigorous growing with strong branches
- Fruit: 8-10 cm, dark green color
- Maturity: 70-75 days after transplanting
- Green fresh and red dry, thin

## Chilli Abha F1, NA-4070

- Tall spreading plants with good branches
- Fruit: 8-10 cm long, green color
- Maturity: 70-75 days after transplanting
- Good pungency

## Chilli Saloni F1, NA-4080

- Vigorous plant growth, high yield
- Fruit: 12-14 cm long, green color
- Maturity: 70-75 days after transplanting
- Suitable for long duration harvest

## Cucumber Samira F1, NA-242

- Vigorous plant growth, high yield
- Fruit: 18-20 cm long, green color
- Harvesting: 40-45 days of sowing
- Shiny Uniform fruits, good shelf life

## Cucumber Amrita F1, NA-235

- Vigorous biet alpha plant, high yield
- Fruit: 19-20 cm long, Shiny dark green color
- Harvesting: 35-40 days of sowing
- Suitable for open field

## Cucumber Chiranjiv F1, NA-245

- Vigorous plant growth
- Fruit: 160-175 gm, medium green color
- Harvesting: 38-40 days of sowing
- Good yield, shiny Uniform fruits

## Cucumber Himani F1, NA-236

- Vigorous plant growth, high yield
- Fruit: 20-21 cm long, attractive dark green color
- Harvesting: 35-40 days of sowing
- Suitable for open field

## Cucumber Champ F1, NA-240

- Medium Vigorous plant growth, Good branches
- Fruit: 18-20 cm long, attractive green color
- Harvesting: 38-40 days of sowing
- Excellent yield, shiny Uniform fruits

## Cucumber Greenhouse Nova F1, NA-55

- parthenocarpic, multistillate strong plant
- Fruit: 18-20 cm long, dark green color
- Harvesting: 35-40 days of sowing
- Suitable for protected cultivation

## Cucumber Greenhouse Blair F1, NA-11

- parthenocarpic, multistillate tall vigorous plant
- Fruit: 18-20 cm long, dark green color
- Harvesting: 35-40 days of sowing
- Suitable for protected cultivation

## Cucumber Greenhouse Gloria F1, NA-22

- parthenocarpic, tall vigorous plant growth
- Fruit: 18-20 cm long, dark green color
- Harvesting: 35-40 days of sowing
- Suitable for protected cultivation

## Cucumber Greenhouse Winner F1, NA-88

- parthenocarpic, tall vigorous plant
- Fruit: 18-20 cm long, dark green color
- Harvesting: 35-40 days of sowing
- Suitable for protected cultivation

## Muskmelon Samrat F1, NA-65

- Vigorous healthy plant, high fruit set
- Fruit: 1-1.25kg round
- Maturity: 65-70 days of sowing
- Good shipping and keeping quality

## MuskMelon Spark F1, NA-01

- Short Vigorous plant growth, high yield
- Attractive round fruit with good netting
- Maturity: 60-65 days of sowing
- orange flesh, sweet good texture, good transport quality

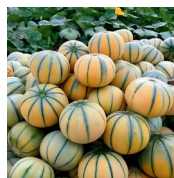

## MuskMelon Basant F1, NA-34

- Vigorous plant growth, high fruit set
- Fruit: 1.5-2 kg, oblong yellow fruit
- Maturity: 65-75 days of sowing
- Suitable for long duration transport

## MuskMelon Bunty F1, NA-33

- Vigorous plant growth, high fruit set
- Fruit: 1-1.25 kg, round, crispy and very tasty fruit
- Maturity: 70-75 days of sowing
- Suitable for long transport

## Okra Disha F1, NA-45

- Medium tall Vigorous plant growth, high yield
- Fruit: 12-14 cm long, dark green color, very short internode
- Maturity: 40-45 days of sowing
- Suitable for long distance transport

## Okra Pinki F1, NA-42

- Medium dwarf Vigorous plant growth, high yield
- Fruit: 12-14 cm long, dark green color, short internode
- Maturity: 40-45 days of sowing
- Tolerance to YVMV and ELCV

## Okra Vamika F1, NA-55

- Medium dwarf Vigorous plant growth, high yield
- Fruit: 14-16 cm long, dark green color, short internode
- Maturity: 45-48 days of sowing
- Tolerance to YVMV and ELCV

## Okra Super Sharda F1, NA-38

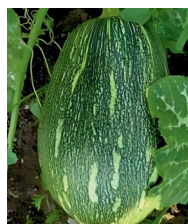

- Medium dwarf Vigorous plant growth, high yield
- Fruit: 14-16 cm long, dark green color, very short internode
- Maturity: 40-45 days of sowing
- Tolerance to YVMV and ELCV

## Okra Ruby F1, NA-40

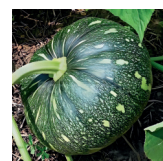

- Medium dwarf Vigorous plant growth, high yield
- Fruit: 14-16 cm long, very dark green color, very short internode
- Maturity: 42-45 days of sowing
- Tolerance to YVMV and ELCV

## Pumpkin Ranjeet F1, NA-672

- Vigorous plant growth, high yield
- Fruit: 2-2.5 kg, oblong green color
- Harvesting: 70-75 days of sowing
- Suitable for long transportation

## Pumpkin Raghu F1, NA-665

- Vigorous plant growth, high yield
- Fruit: 2-2.5 kg round, mottled green color
- Harvesting: 65-70 days of sowing
- Suitable for long transport

## Pumpkin Dalip F1, NA-660

- Vigorous plant growth, high yield
- Fruit: 1-1.25 kg round, mottled green color
- Harvesting: 60-65 days of sowing
- Suitable for long transportation

## Radish Diamond White F1, NA-33

- Erect plant, cylindrical root shape
- Root: 40-45 cm long, attractive white color
- Harvesting: 40-45 days of sowing
- root weight 300 - 350 gm

## Radish Sunlight F1, NA-34

- Erect plant, cylindrical root shape
- Root: 40-45 cm long, attractive white color
- Harvesting: 40-45 days of sowing
- root weight 300 - 350 gm

## Radish Jyoti F1, NA-36

- Erect plant, tapering roots shape
- Root: 28-30 cm long, attractive white color
- Harvesting: 30-35 days of sowing
- root weight 100-150 gm

## Radish Moonlight F1, NA-38

- Erect plant, tapering roots shape
- Root: 25-30 cm long, attractive white color
- Harvesting: 30-35 days of sowing
- root weight 100-150 gm

## Ridge Gourd Jivika F1, NA-155

- Medium long fruit with deep ridges
- Fruit: 30-35 cm long, attractive green color
- Harvesting: 50-55 days of sowing
- Average fruit weight 180-200 gm

## Ridge Gourd Lavika F1, NA-165

- Long fruit with deep ridges
- Fruit: 30-35 cm long, attractive green color
- Harvesting: 50-55 days of sowing
- Average fruit weight 200-220 gm

## Sponge Gourd Neelam F1, NA-80

- Early Vigorous plant, high yield
- Fruit: 25-30 cm long, cylindrical, dark green color
- Maturity : 40-45 days of sowing
- Average fruit weight 150-200 gm

## Sponge Gourd Neha F1, NA-82

- Early Vigorous plant, high yield
- Fruit: 25-30 cm long, cylindrical, dark green color
- Maturity : 40-45 days of sowing
- Average fruit weight 150-200 gm

## Squash Eva F1, NA-2266

- Early Maturity, High Yield
- Attractive Yellowish Golden Color
- Fruit: 20-22 cm long
- Tolerance to powdery mildew

## Squash Sarita F1, NA-2250

- Vigorous plant growth, high yield
- Fruit: 20-22 cm long, Mottled dark green color
- Early Maturity, Highly Uniform fruits

## Squash Daksh F1, NA-2244

- Vigorous plant growth, high yield
- Uniform fruit, Early maturity
- Harvesting: 50-55 days of sowing
- Suitable for North India

## Squash Stella F1, NA-2255

- Vigorous plant growth, high yield
- Fruit: 18-20 cm long, Mottled dark green color
- Highly uniform fruits, Early maturity

## Squash Hero F1, NA-2288

- Vigorous plant growth, high yield
- Early maturity with uniform fruits
- Harvesting: 50-55 days of sowing
- Continuous and concentrated fruit setting

## Tomato Zircon F1, NA-1044

- Tall Determinate Vigorous plant growth, high yield
- Fruit: 90-100 g, Deep red color, Oval shape
- Harvesting: 65-70 days after planting
- Excellent firmness, Suitable for long shipping

## Tomato Marcos F1, NA-1022

- Determinate Vigorous plant growth, high yield
- Fruit: 80-90 g, Deep red color, Round shape
- Harvesting: 70-75 days after planting
- Very good firmness, Suitable for long shipping

## Tomato Hemant F1, NA-1090

- Determinate Vigorous plant growth, high yield
- Fruit: 90-100 g, Deep red color, Oval shape
- Harvesting: 65-70 days after planting
- Excellent firmness, Suitable for long shipping

## Tomato Abhiraj F1, NA-1005

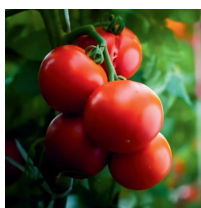

- Indeterminate Vigorous plant growth, Very high yield
- Fruit: 80-90 g, Deep red color, Round Oblate shape
- Harvesting: 65-70 days after planting
- Excellent firmness, Suitable for long shipping

## Tomato Jasper F1, NA-1042

- Semi determinate tall Vigorous plant growth, high yield
- Fruit: 80-90 g, Deep red color, Round shape
- Harvesting: 65-70 days after planting
- Good firmness, Suitable for long shipping

## Tomato Himal F1, NA-1050

- Indeterminate Vigorous plant growth, Very high yield
- Fruit: 80-90 g, Deep red color, Flat round shape
- Harvesting: 70-75 days after planting
- Excellent firmness, Suitable for long shipping

## Tomato Leo F1, NA-1032

- Determinate Vigorous plant growth, high yield
- Fruit: 80-90 g, Deep red color, Round shape
- Harvesting: 65-70 days after planting, Early maturity
- Very good firmness, Suitable for long shipping

## Watermelon Raja F1, NA-590

- Vigorous plant growth, high yield
- Fruit: 8-10 Kg, Light green with light green stripes, Oblong, Attractive deep red flesh
- Harvesting: 70-75 days of sowing
- Suitable for long shipping

## Watermelon Arya F1, NA-550

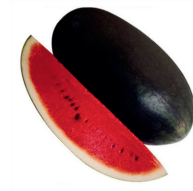

- Vigorous plant growth, high yield
- Fruit: 3-4 Kg, Light green with light green stripes, Oblong, Attractive yellow flesh
- Harvesting: 70-75 days of sowing
- Suitable for long shipping

## Watermelon Arjun F1, NA-520

- Vigorous plant growth, high yield
- Fruit: 4-4.5 Kg, Attractive bluish black oblong fruit, Deep red flesh
- Harvesting: 60-65 days of sowing
- Suitable for long shipping

## Watermelon Bheem F1, NA-540

- Vigorous plant growth, high yield
- Fruit: 4.5-5 Kg, bluish black oblong fruit, Attractive deep red flesh
- Harvesting: 60-65 days of sowing
- Suitable for long shipping

## Watermelon Virat F1, NA-560

- Vigorous plant growth, high yield
- Fruit: 3-4 Kg, Smooth yellow with deep red flesh
- Harvesting: 65-70 days of sowing
- Suitable for long shipping

## Peas, NA-565

- Early Vigorous plant
- Early maturity, Green fruits, Slightly curved pod, 7-9 grains per pod
- Harvesting: 60-65 days of sowing

## Peas, NA-595

- Tall Vigorous plant
- Green fruits, Slightly curved pod, 9-10 grains per pod
- Harvesting: 90-95 days of sowing
- Tolerance to powdery mildew

## Pole Beans Surbhi, NA-125

- Medium early maturity, Vigorous plant
- Fruit: 14-16 Cm, Dark green pods
- Harvesting: 65-70 days of sowing
- Suitable for long shipping
